

# Constructing a Jig

A jig is a device that helps you sew over bulky seams

1. Fold fabric, in this case denim, 4 to 6 layers thick.
2. Quilt fabric layers and zigzag raw edges leaving the folded edge as is.
3. Cut a notch\* on the folded fabric edge, zigzagging it so there are no loose fibers to get caught in the sewing.

4.\* The notch should be about the size of the beltloops.

5. Secure the beltloop and sew in place.
